

# LOVE DESIGN STUDIO/O

## New Member Profile: Love Design Studio

We welcome new ISEP member, **Love Design Studio** – an environmental consultancy that works in the built environment. They are a collection of environmental consultants, designers, engineers and technicians and have a hub in Islington.

They look to help clients on all sorts of sustainability-related themes including environmental planning, low-carbon retrofitting and energy modelling projects.

In the retrofit sphere they predominantly advise landlords and homeowners, but are also eager to talk with companies in Islington who are seeking zero-carbon and healthier buildings.
